ABOUT UNIFAI

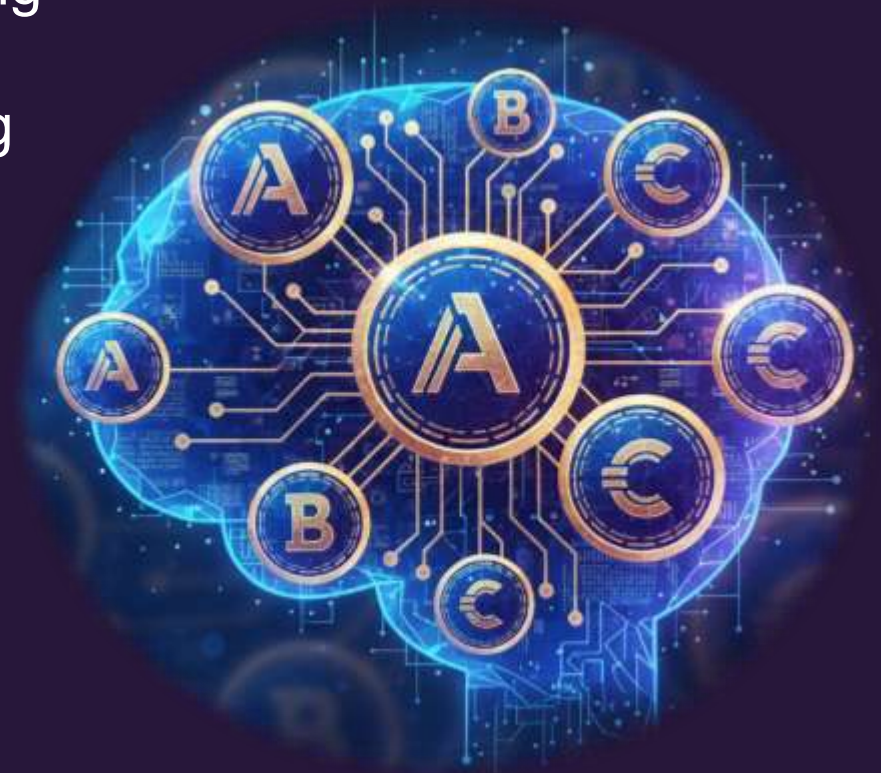

What is UnifAI?

UnifAI represents the next evolution in financial trading infrastructure, it is an autonomous AI agent platform that bridges traditional crypto trading with decentralized finance (DeFi).

For End Users: Your Personal Trading Autopilot

UnifAI acts as an **intelligent, always running trading advisor** that:

- **Executes strategies autonomously:** Trades on your behalf 24/7 without requiring constant monitoring
- **Adapts to market conditions:** Dynamically adjusts strategies based on volatility, liquidity, and trend
- **Eliminates technical barriers:** No need for deep programming knowledge or constant chart-watching
- **Maximizes opportunities:** Captures fleeting arbitrage and trend opportunities humans might miss
- **Personalizes to your goals:** Tailors risk levels and strategy choices to individual preferences

Mission – Vision

UnifAI's mission is to empower individuals and developers by delivering secure, intelligent, and adaptive AI-driven financial systems, enabling autonomous decision making, automated DeFi strategies, and the creation of next generation agentic finance applications.

UnifAI envisions a future of agentic finance where AI acts as a personalized advisor and trader for every user, automating strategies, guiding decisions, and maximizing opportunities across DeFi with intelligence, security, and adaptability. At the same time, UnifAI provides the infrastructure that developers need to create the next generation of AI-driven financial applications.

Key Capabilities

- **Dynamic Tool Discovery** – Agents can search, find, and use tools on demand.
- **Strategy Execution** – Automate DeFi strategies across liquidity provision, trading, borrowing/lending, and more.
- **Unified API** – A single integration point to access the entire ecosystem of DeFi tools.
- **Autonomous Operation** – Agents independently discover tools, execute tasks, and manage workflows.
- **Model Compatibility** – Works with any LLM that supports function calling.
- **Security-First Design** – Private keys and sensitive data remain client-side with configurable access controls.
- **Limitless Possibilities** – Developers and users can explore new strategies, agent designs, and automated workflows.

Tokenomics Analysis

Community First Approach:

13.33% community allocation is significantly higher than typical 5-8% in most crypto projects, demonstrating commitment to decentralization and user ownership.

Allocation of 1 Billion Units of Currency

20% Protocol Development

Infrastructure, AI integration, features

Strategic Partnerships

Major Investors & Backers

Tier 1 VCs

HashKey Capital • Anagram •
Dispersion Capital • Finality
Capital • Symbolic Capital •
Alumni Ventures

Major Exchanges

• Bitget • Binance

Ecosystem Partners

Meteora • Polymarket • Aethir •
Mantle • Sentient • Plume • LP Army •
Flipside • Open Ledger

Active Collaborations

- **Meteora Rising Incubator:** Grant recipient for liquidity strategy development
- **Polymarket \$1M Builders Program:** Prediction market automation participant
- **Aethir \$100M Ecosystem Fund:** Batch 6 recipient for GPU infrastructure
- **LP Army:** Market-making expertise and community collaboration

Development Roadmap

✅ Completed Milestones (2025)

- Platform development and testing
- SDK release for developers
- 100+ DeFi protocol integrations
- Token Generation Event (Nov 6, 2025)
- First community airdrop
- Major exchange listings
- Open-source AI evaluation framework

🚀 Current & Near-Term (Q4 2025 – Q3 2026)

- Community workshop series
- Polymarket integration expansion
- Hyperliquid backend completion
- Additional EVM expansion
- Mobile application launch

🌌 Long Term Vision (2026+)

- Establish as standard AI-DeFi infrastructure
- Support thousands of autonomous agents
- Multi-billion dollar assets under management
- Full governance decentralization
- Industry-standard benchmarking adoption

UnifAI Network

Future Projections

UnifAI's Market Positioning

UnifAI operates at the strategic convergence of two massive, rapidly growing markets: Artificial Intelligence and Decentralized Finance. This unique positioning provides exposure to both sectors' growth trajectories.

DEFI TOTAL VALUE LOCKED

\$50-100B

Current DeFi ecosystem value (2025). Growing 15-25% annually with institutional adoption increasing.

AI AGENT MARKET

\$50B+

Projected by 2030. Autonomous AI systems transforming industries with **CAGR of 40-45%**.

DEFI AUTOMATION

\$10-20B

Largely untapped opportunity. Estimated 10-20% of DeFi TVL seeking automation solutions.

UnifAI DeFi

Key Features of UnifAI DeFi

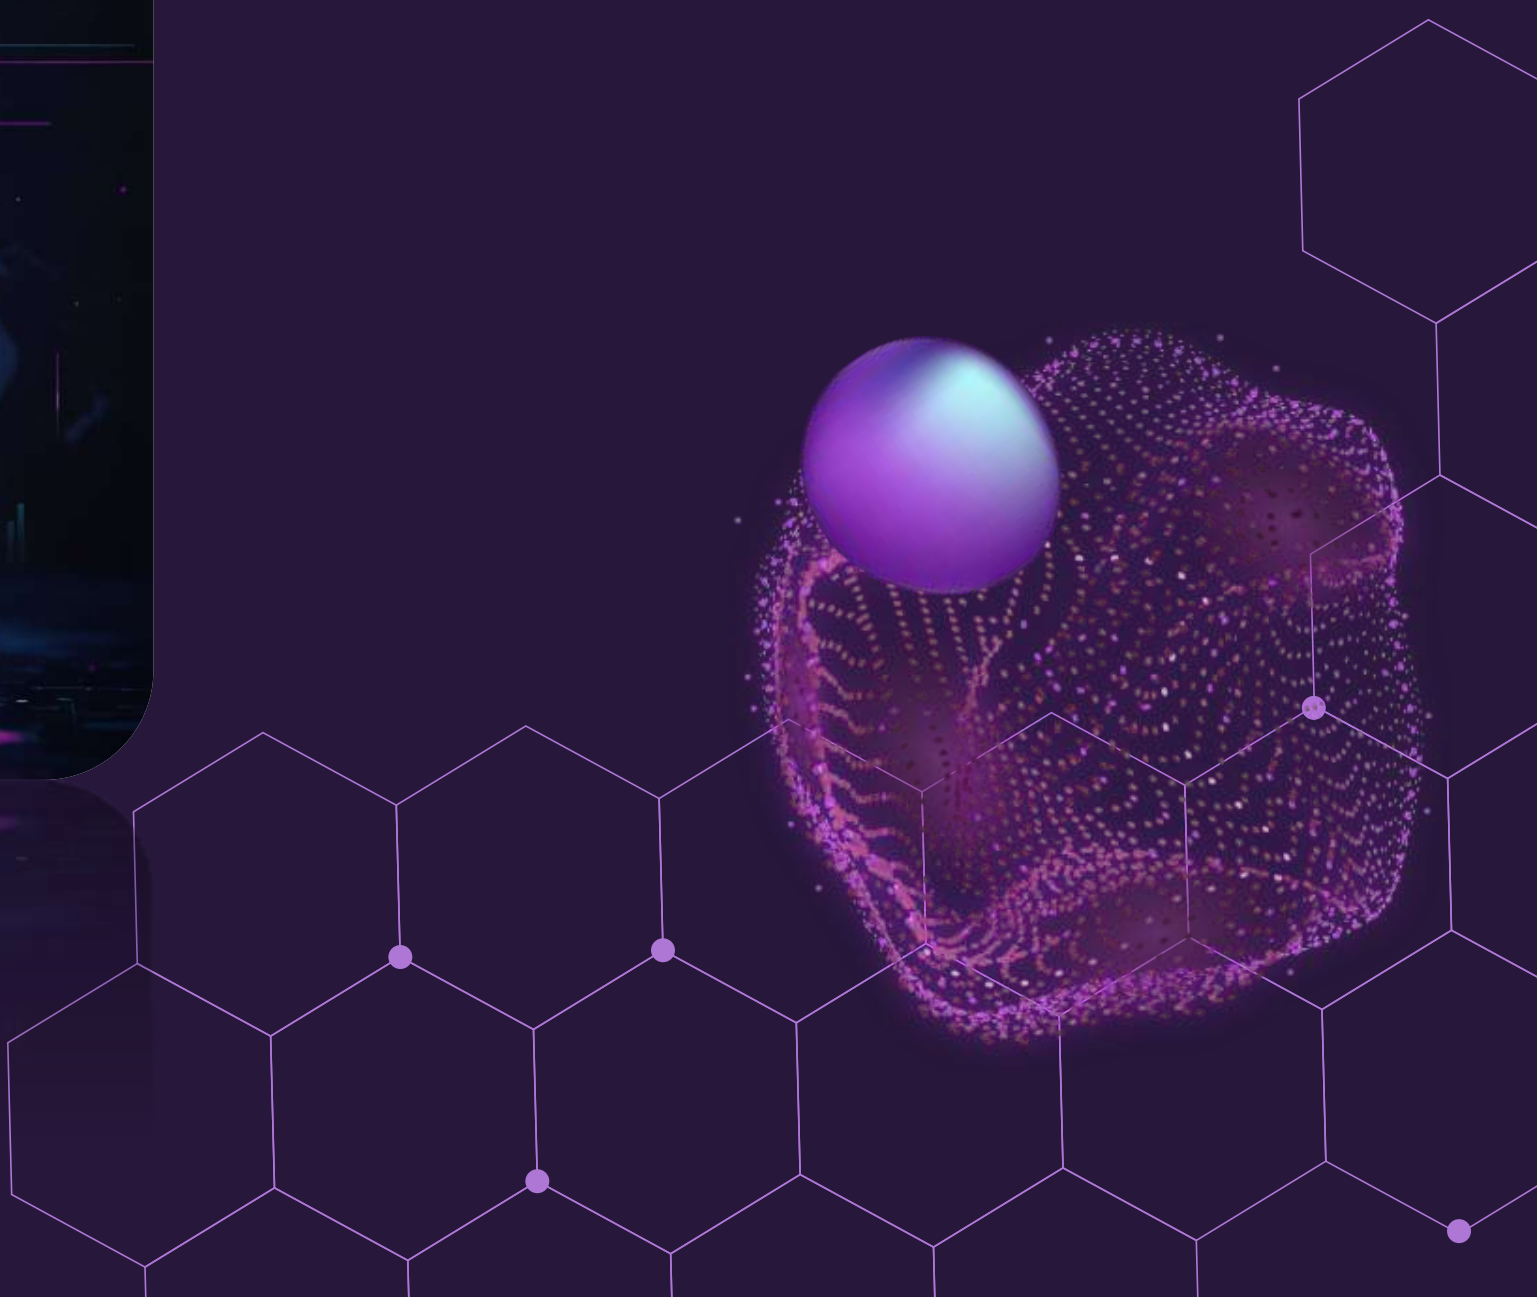

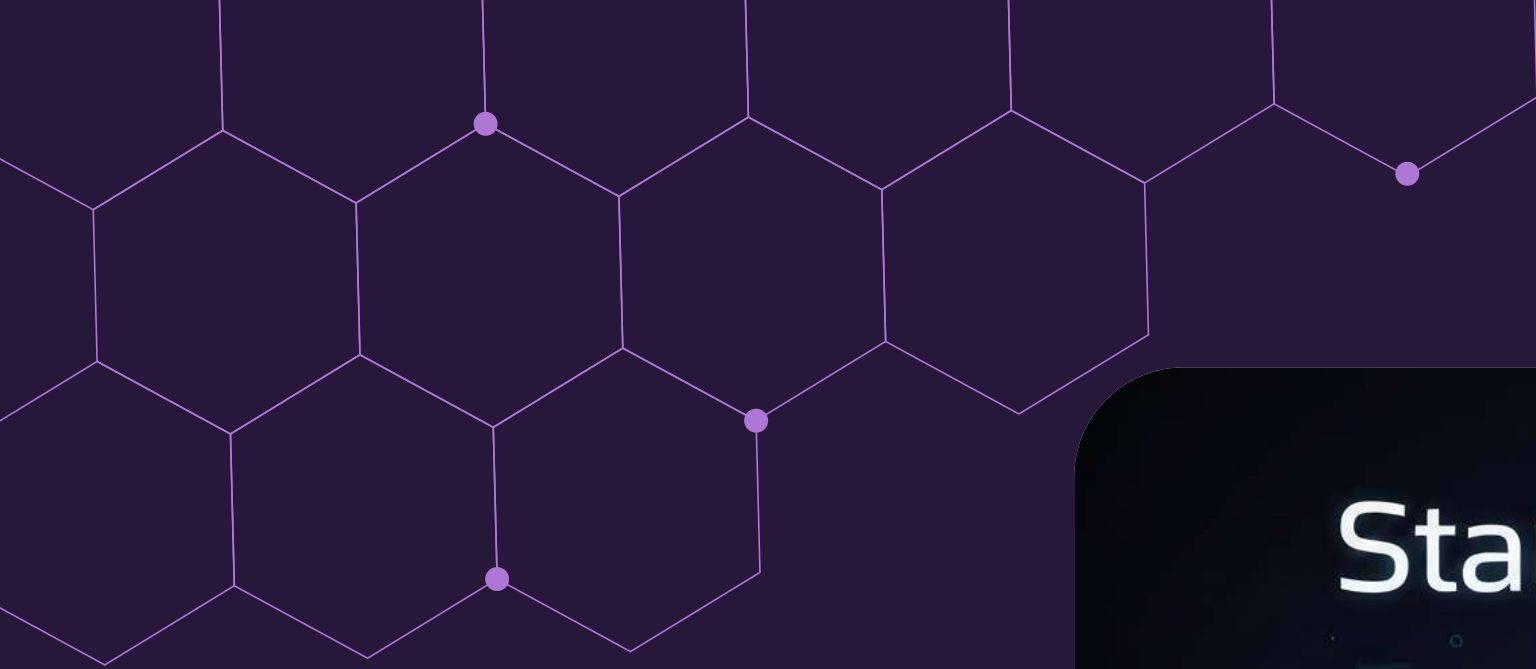

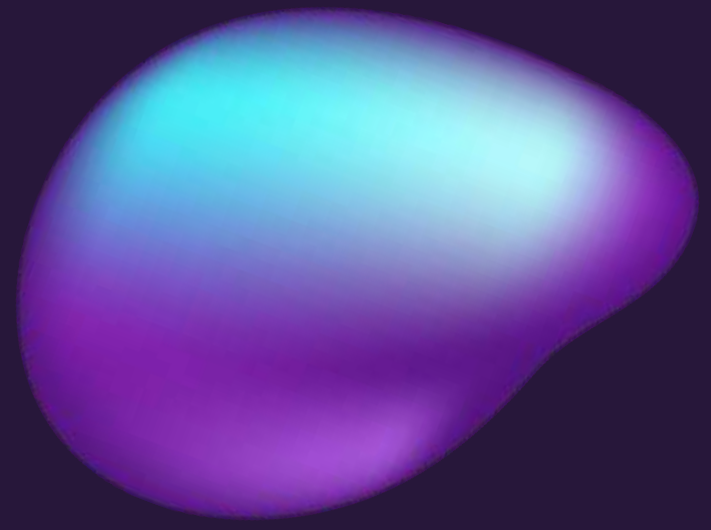

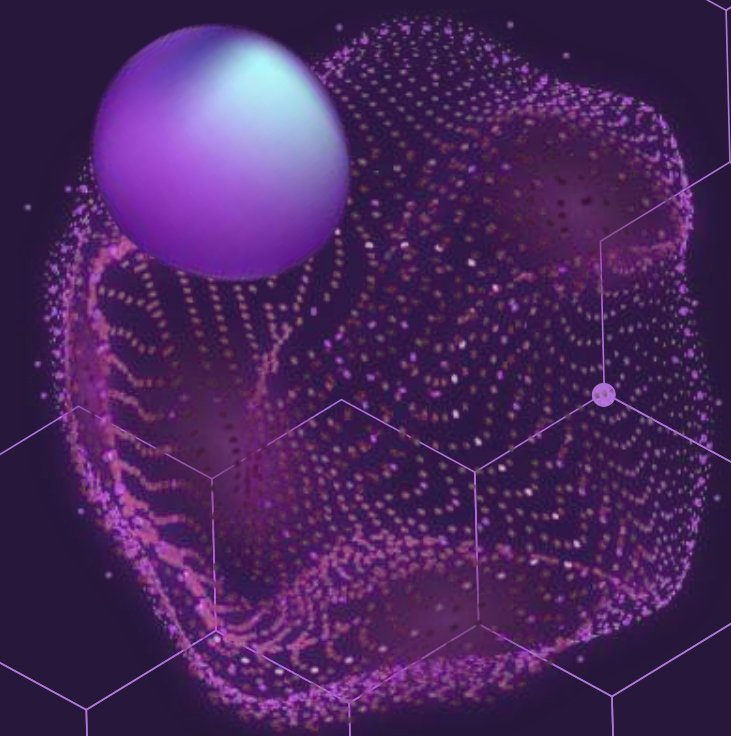

- **AI Infrastructure**
- **Automated DeFi Execution**
- **Dynamic & Adaptive Agents**
- **Advanced Strategy Automation**
- **Security First Design**
- **Personalized AI Advisor Vision**
- **Simplified Decision Making**

The New Reality

DeFi, NFTs & the Metaverse — How they are integrated

- DeFi as financial rails for digital economy
- NFTs as identity, ownership and basic commercial tool
- Metaverse as the User Experience (UX) layer
- Data & AI infrastructure

Layer-2 networks, cross-chain bridges and digital identity tools will **connect DeFi, NFTs and the Metaverse**, making it easy for users to move their assets and digital identity across different platforms. **Indian-origin projects** with global presence, such as the **Polygon ecosystem**, are already building this shared infrastructure.
